

Report

In the following graph, we can observe the distribution of different electric vehicle brands in the state of Washington. As mentioned earlier, it is no coincidence that Tesla dominates as the most predominant electric vehicle brand.

This is due to Tesla's vehicles having autonomous driving capabilities, meaning they can drive themselves. While Tesla vehicles are not cheap, the various features they offer justify their price.

On the other hand, other brands do not hold as significant a percentage, posing no real challenge to Tesla in the market. These brands need to identify what Tesla is doing differently in order to capture a larger share and increase competitiveness.

It is also worth noting that the brands present, aside from Tesla, do not focus on creating electric vehicles; rather, they are focused on other niches and view electric vehicles as a secondary market opportunity. electric vehicle market.

Brands with Most Electric Vehicles
